

SES-5

@ 5° East - Ku-Band

The most powerful Sub-Saharan satellite in Ku-band – a fast growing neighborhood in a diverse and dynamic emerging TV market!

Reaches a community of:

- A potential of 53 million TV households with an estimated 20 million increase until 2020
- About 50 countries covered and a growing demand for TV content by satellite
- Existing and growing Free-to-air, cable, DTT and MMDS audiences
- Home of new Pay-TV packages as Zuku, StarSat and Openview HD
- A growing community of Free-to-Air channels

On this satellite, Globecast offers:

- All means to get your program to SES-5
- One-hop delivery from Europe to the entire Sub-Saharan African region with 2 DTH DVB-S platforms managed from Paris
- Assistance to build your own Pay-TV network or to integrate existing Pay-TV packages*
- Receiving antennas as small as 60cm to 90cm depending on the area

Carries a diverse neighborhood:

- 250+ TV channels with 26 in HD and 102 radios with prime regional, pan-African and international programming
- Diverse content from major broadcasters in multiple languages – everything from news and sports to cultural, educational and religious programming
