

SNG and Flyaways

Sports, news, enterprise events, prime time, we have the mobile units adapted to your events coverage

Globecast maintains a large fleet of mobile satellite transmission vehicles to satisfy your needs. Whether it's a satellite transmission unit to transmit an opera in HD, a flyaway to cover the release of a hostage, an SNG with 4 cameras for a football game or your company's event: we have the solution and can be on the scene on five continents

SNG and Flyaways

Main users

- TV channels and IP content distributors
- Production companies and event agencies
- Host broadcasters and event organizers
- Sports federations and rightsholders
- Companies and public service agencies

Our fleet

Our fleet includes over 60 units (SNG and flyaways) on 5 continents with a strong presence in Europe (41 units, 11 in HD)

- SNG
 - Our lightweight or heavyweight vehicles are :
 - SD and HD capable
 - Monofeed, bifeed or with integrated multiplex (up to 6 simultaneous signals)
 - Multi-camera production units (up to 5 cameras)
 - Powered by generators set and/or transformers (zero power cut)

- Flyaways

From lightweight antennas that can travel as checked baggage by plane in case of emergency, to 2.40m C-Band antennas for use in distant regions, our fleet of flyaways allows you to broadcast from wherever you are, even the most inaccessible places. Our flyaways are SD or HD, monofeed, bifeed or with integrated multiplex.

Our services

- 24x7 deployments via our 6 booking centers and dedicated hotlines
- Management of associated space capacity (connection checkup, reservation, etc.)
- Project management and coordination on site (site scouting, permits and licensing, freight, security, etc.)
- Additional equipment supply (production, communication, etc.)

Key advantages

- Experienced operators used to all kind of situations: catastrophes, armed conflicts, etc.
- Rescue maintenance and equipment
- Bases in France, Italy, United Kingdom, Singapore, Kenya, South, Africa and Australia
- Partnerships with satellite operators for global coverage

Globecast and 3D

- Globecast has been a pioneer in HD since 2004. Today Globecast maintains the lead that it acquired throughout the years, with a large number of events delivered in High Definition.

Since 2009, Globecast has been also a leader in 3D contributions with many sport events and entertainments delivered in HD 3D in side by side or in H.264 4:2:2 10-bits duallink.

3D
